

Geography competition!

Please see or email Ms Birch if you would like more information.

1. Physical geography student photo competition – Year 7 upwards.

The theme is “The power of physical geography”. This year’s competition challenges students to discover evidence of the power of physical geography, capture it in a **photograph** and explain why and how their example illustrates the power of physical geography in an accompanying caption (up to 250 words).

You need to state its precise location in your writing. Physical geography and its processes can be found in towns and cities just as easily as out in the countryside. Your photograph can be taken anywhere in the world, but the photograph you use must be taken by you.

Examples will be on Teams under “Geography Competitions”.

Hand in your entry in to Ms Birch when we come back in September. Closing date will be Friday 13th September 2024.
